

Lethbridge Woman Earns Top Professional Speaking Designation in the World!

Toastmasters International celebrates the skill and expertise of Freddi Dogterom by awarding her the prestigious Accredited Speaker designation.

The Accredited Speaker Program acknowledges Toastmasters who achieve an exemplary level of proficiency resulting in them being much sought-after professional speakers.

Being an Accredited Speaker sets you apart from other professional speakers because your talent and ability are recognized by Toastmasters International, the world leader in communication and leadership development.

Unlike other professional certifications, you cannot simply complete a list of tasks to become an Accredited Speaker. Instead, you must demonstrate your speaking abilities before a live audience. Program candidates progress through two levels of evaluation and are judged by a panel of professional speakers. It is a rigorous, yet worthwhile process.

Since the program's inception in 1981, only 75 people in the world, encompassing more than 350,000 members, have been successful. In Canada, only ten Toastmasters are Accredited Speakers; in Alberta, two—one of whom is Freddi.

Freddi says, "My dream came true in Vancouver on August 26th. In front of roughly 1,800 people from 140 different countries I presented "*Your Retirement Prescription – It Takes More than Money*" to a panel of judges. They all concurred and I was awarded the honour of joining this esteemed group of professional speakers."

Freddi is a well-known keynote speaker, trainer and facilitator who presents across North America-including the *far* north. Her expertise is in Retirement Life Planning, Personality Training and planning and setting life goals. Earlier this year she was also honored by the Career Development Association of Alberta with a Lifetime Membership for significant contributions to the Career Development field.

Ask Freddi about her award winning keynote presentations: *Not ALL the Monkeys are in the Zoo!*, *The Chosen Frozen - Surviving and Thriving in the Arctic*, and, *Your Retirement Prescription – it Takes More Than Money*.
